

THE WORLD'S OLDEST STAR MAP

star disk is now
a landmark universe

known green site
travel by magic

oldest surrounded world
known to map lunar use

ground will move sky
set astronomical time

moon tower words
with crescent between

discover our cosmos
in the time of bronze

hypothetical maps
a conceptual clock

axe symbols appeal
as between arrives

site depiction interpreted
stuck where pain's inlaid

patina stones failed
by impact philosophy

these transit travellers
finding having work

chisel star movement
is beautiful and gold

blue diameter full of
temporarily wide night

a great mysterious
time dated device

linking oldest symbols
to surrounding astronomy

the concept of place
history and time
